EXPERIENCE

Kimaru.ai Remote

Software Development Engineer, Frontend Lead May 2026 – Present

- Own frontend architecture for an AI decision-intelligence platform, designing a configurable React and TypeScript foundation that onboards new enterprise clients without code changes.
- Partner with founders on enterprise pursuits, translating each prospect's operational challenges into targeted use cases and delivering tailored product demonstrations that anchor new-client pitches.
- Built and launched the company's internal project-management platform end to end on GCP (Cloud Run, Firestore), giving the entire team a single source of truth for planning, ownership and daily progress.

Software Development Engineer Aug 2025 – Apr 2026

- Reduced cloud operating costs by 52% by containerizing services with Docker and right-sizing AWS EC2 capacity, while sustaining 99.9% availability.
- Diagnosed recurring API timeouts in geographic route computation and introduced a caching layer with automated API-key failover, improving load times by 80% and eliminating rate-limit outages.
- Led the migration of a 10,000-line codebase to a modular TypeScript architecture, decoupling business logic from presentation and reducing runtime errors by 40%.

Software Development Engineer Intern May 2025 – Jul 2025

- Automated backend API validation with 10+ Postman test suites, reducing manual QA effort by 25%.
- Built reusable React and Material UI components, establishing a shared UI library across 3 core product modules.

PROJECTS

Decentralized Real-Time Web3 Application | *React, Node.js, WebSocket, Solidity*

- Architected a blockchain application with Solidity smart contracts for secure on-chain transactions and MetaMask-based authentication.
- Designed a low-latency WebSocket layer that synchronizes state across concurrent user sessions in real time.

buyCrypt – Crypto Trading Platform | *React, Material UI, Storybook* GitHub

- Developed a scalable cryptocurrency trading platform in React using Atomic Design, with a reusable component library documented in Storybook.
- Integrated RESTful APIs and optimized client-side rendering for responsive, real-time price and state updates.

TECHNICAL SKILLS

Languages:	Java, Python, TypeScript, JavaScript, SQL, Solidity
Frontend:	React, Vite, TanStack Query, Tailwind CSS, Material UI, Storybook
Backend & Data:	Node.js, Express.js, REST APIs, WebSocket, MySQL, Firestore
Cloud & DevOps:	AWS (EC2), GCP (Cloud Run, Cloud Build), Docker, GitHub Actions, CI/CD
Core Concepts:	Data Structures & Algorithms, System Design, Distributed Caching, OOP

EDUCATION

Vellore Institute of Technology, Amaravati – B.Tech in Computer Science and Engineering; CGPA 8.76/10 Nov 2021 – May 2025

Narayana Junior College, Vijayawada – Class XII (BIEAP); 98.8% Jun 2019 – May 2021

ACHIEVEMENTS

- Promoted from intern to Frontend Lead at Kimaru.ai within 12 months.
- Earned 5+ LeetCode badges, including the 50-day and 100-day consistency badges, through sustained problem-solving practice.
- Ranked in the Top 10 among competing teams at the VIT-AP National Hackathon 2022.
